

To the FCC:Re: NAB's petition 04-160 and HR 4026

I purchased a car in January 2004 that came fitted for XM Satellite Radio... and now I'm hooked!! It's all I listen to; I haven't even inserted a CD into the CD player.

I enjoy all aspects of XM programming, especially the fact that I can listen to what I like, when I like. I travel considerably, including to other states, and appreciate being able to ascertain local driving and weather conditions through XM Radio prior to or during my trip. XM's program variety is just NOT available anywhere on commercial radio, even in the aggregate.

I am appalled by the NAB's lobbying on behalf of commercial radio - they are attempting to eliminate XM's Constitutional right to free speech and my right as a paying consumer to select the provider I choose. VOTE "NO"ON NAB'S PETITION 04-160!!
